Don't waste money
in hauling unnecessary deadweight
Put " Prestalls " on

TRADE **" PRESTALL "** MARK

WROUGHT STEEL

VACUUM BRAKE CYLINDERS

start saving money as soon as they are installed, because they are at least 30 per cent. lighter than cast-iron cylinders of corresponding size.

The use of " Prestall " Cylinders can reduce the deadweight of brake equipment by as much as FROM ONE TO TWO TONS PER TRAIN. There are actually trains in service to-day on which this valuable economy has been realised.

The cylinders also are designed to simplify maintenance—the rolling ring is very rapidly accessible while the detachable part is so light that it does not require special tackle to handle it.

All cast-iron parts are eliminated, and the cylinders are consequently considerably stronger and more durable than cast-iron cylinders.

CONTENTS

OF THE

13th YEAR OF THE ENGLISH EDITION.

No. 1. — January 1931.

	PAGES.	NUMBERS of the decimal classification.
I. Electrification of a portion of the Orleans Company's System, by Mr. PARODI	4	621.33 (.44)
II. The use of franking machines on the Norwegian State Railways, by A. JYNGE	34	651 (.481)
III. The elastic hollow railway sleeper , by Mr. SCHEIBE	37	625.142.3
IV. A new system of permanent way construction , by F. STRAUSS	42	625.14 (.436)
V. Tranship traffic , by H. W. PAYNE	51	656.21 (.42) & 656.225 (.42)
VI. The Pennsylvania install car retarders in Pitcairn Yard near Pittsburgh, Pa.	62	625.258 (.73) & 656.254 (.73)
VII. Car retarders installed by Chicago & North Western Railroad at Proviso Yard, near Chicago	68	625.258 (.73) & 656.254 (.73)
VIII. Railroad use of aluminum alloys	75	625.235, 625.246 & 669
IX. CURRENT PRACTICE: London & North Eastern Railway 1st class sleeping cars	80	625.232 (.42)
X. MONTHLY BIBLIOGRAPHY OF RAILWAYS	1	...

No. 2. — February 1931.

I. **Eleventh Session, Madrid: 5-15 May 1930.**

General Proceedings in Sections and in General Meetings.

Section I: Locomotives and rolling stock:

Inaugural Meeting of the 2nd Section	85	385.06.112
QUESTION V. — Locomotives of new types; in particular turbine locomotives and internal combustion motor locomotives	87	621.132.8
QUESTION VI. — Improvements in the steam locomotive	113	621.134
QUESTION VII. — Electric locomotives for main line traction	120	621.335
QUESTION VIII. — All-steel coaches. Comparison with vehicles built of wood	151	625.23

Section II: MISCELLANEOUS INFORMATION:

1. New London & North Eastern track-laying machine	168	625.144.4 (.42)
2. Electric welding in railway work.	169	621.392 (.42)

No. 2. — February 1931 (CONTINUED).

III. NEW BOOKS AND PUBLICATIONS :

Electrification of steam railroads, by Electrification of Steam Railroads Committee (U. S. A.)

PAGES.	NUMBERS of the dec mal classification.

173 621 .33

IV. OFFICIAL INFORMATION ISSUED BY THE PERMANENT COMMISSION OF THE INTERNATIONAL RAILWAY CONGRESS ASSOCIATION :

Meeting held by the Permanent Commission on the 18 October 1930

174 385. (06.111)

No. 3. — March 1931.

I. Flexibility of railway vehicles on curves, by H. LIECHTY.

179 625 .2 (01 & 625 .215)

II. Railway electrification in Great Britain. An historical and practical review of existing conditions, by Roger T. SMITH

201 621 .33 (.42)

III. The Road Traffic Act, 1930 (Great Britain), by Frederick G. BRISTOW.

210 347 .783 (.42) & 656 .1 (.42)

IV. Frölich hydraulic car retarder system at Whitemoor Yard, London & North Eastern Railway (England)

216 625 .258 (.42) & 656 .254 (.42)

V. Statistics of rail breakages during the year 1929

227 313 : 625 .143.3

VI. NEW BOOKS AND PUBLICATIONS :

American railway signaling and practices, (Chapter IX, Rectifiers; Chapter XII, Semaphore signals; Chapter XIII, Light signals; Chapter XVIII, Electro-pneumatic interlocking), by the American Railway Association, Signal Section.

278 656 .25 (02 (.73)

VII. MONTHLY BIBLIOGRAPHY OF RAILWAYS

25

No. 4. — April 1931.

I. Eleventh Session, Madrid : 5-15 May 1930.

General Proceedings in Sections and in General Meetings.

3rd Section — Working :

Inaugural Meeting of the 3rd Section

281 385. (06.112

QUESTION IX. — Relations between railways and sea ports

283 656 .213

QUESTION X. — Methods to be used in marshalling yards to control the speed of vehicles being shunted and to ensure they travel on to the lines in the various groups of sidings

299 625 .258 & 656 .212.5

QUESTION XI. — Signalling of lines for fast traffic and in main stations. Daylight signals. Automatic block system

332 656 .25

QUESTION XII. — Economical traction methods for use in particular cases

352 621 .132.8 & 656 .22

II. The calculation of continuous girders carried on columns rigidly held at their bases. Practical method of calculation, by R. VALLETTE

372 624 .2 (01

No. 5. — May 1931.

	PAGES.	NUMBERS of the decimal classification.
I. High-pressure locomotives, by H. N. GRESLEY	377	621.134.3
II. Type 5 "Mikado" locomotives of the Belgian Railways, by F. LEGEIN	407	621.132.3 (.493)
III. Statistics of rail breakages during the year 1929 (concluded)	423	313 : 625.143.3
IV. CURRENT PRACTICE :		
The new "Ro-Railer", London Midland and Scottish Railway.	464	656.1(.42) & 656.2(.42)
V. MISCELLANEOUS INFORMATION :		
Automatic train control in England.	469	656.254 (.42)
VI. OFFICIAL INFORMATION issued by the Permanent Commission of the International Railway Congress Association :		
Questions for discussion at the Cairo Congress (1933) with names of the Reporters	472	385.(06,111

No. 6. — June 1931.

I. Eleventh Session, Madrid : 5-15 May 1930.

General Proceedings in Sections and in General Meetings.

4th Section. — General :

Inaugural Meeting of the 4th Section	479	385.(06,112
QUESTION XIII. — Competition of road transport.	481	656.1 & 656.2
QUESTION XIV. — Use in railway work of machines for simplifying statistical and accountancy work.	520	651 & 652
QUESTION XV. — Cooperation of the staff towards increased efficiency and its participation in the profits.	527	385.524
QUESTION XVI. — Methods followed in training of staff, professional, technical and ordinary working grades	555	385.7 & 385.586
V. Wireless installation on trains of the French State Railways.	570	656.254

No. 7. — July 1931.

I. A description of the method of carrying out locomotive tests on the Polish State Railways, by Prof. A. CZECHOTT.	575	621.131.3 (.438)
II. The Belgian National Railway Company's "Consolidation" class 35 locomotive, by F. LEGEIN	606	621.132.5 (.493)
III. Articulated locomotive working on the Somain-Anzin and Belgian Frontier Railway, by P. BACLE	619	621.132.8 (.44)

No. 7. — July 1931 (CONTINUED).

	PAGES.	NUMBERS of the decimal classification.
IV. Electrification of Austrian Federal Railways. Progress made and lines of further development, by F. STRAUSS	632	621 .33 (.436)
V. Slipper brakes in shunting yards.	643	625 .25 ^c (.44) & 656 .254 (.42)
VI. MISCELLANEOUS INFORMATION :		
1. Transverse fissures in steel rails	649	625 .143.3
2. Automatic train control on Great Western of England	651	656 .254 (.42)
VII. NEW BOOKS AND PUBLICATIONS :		
Die Deutsche Reichsbahn und ihre Beziehungen zu ausländischen Eisenbahnen (The German Railways and their relations with the railways of other countries), by P. WOLF	655	385 .6 (.43)
Centenarul Cailor Ferate (1830-1930) [(The Centenary of Railways (1830-1930))]	655	385 .09
L'évolution et le développement des principales industries depuis 50 ans (1880-1930) [The evolution and development of the chief industries for the last fifty years (1880-1930)]. Special number of the " Génie Civil "	656	62 .09
VIII. MONTHLY BIBLIOGRAPHY OF RAILWAYS	69	...

No. 8. — August 1931.

I. Eleventh Session, Madrid : 5-15 May 1930.

General Proceedings in Sections and in General Meetings.

5th Section : Light railways and colonial railways :

Inaugural Meeting of the 5th Section	659	385 .06.112
QUESTION XVII. — Penetration railways.	661	385 .01
QUESTION XVIII. — Improvements in the permanent way equipment of light railways.	682	625 .614
QUESTION XIX. — Electrification of secondary lines.	688	621 .33
QUESTION XX. — Rail motor vehicles.	701	621 .132.8
II. The advantages and disadvantages of articulated cars in railway operation, more particularly for services in densely populated suburban districts, by Ad. M. Hug.	703	621 .338
III. The " 3-30 ". — The next locomotive (?), by S. S.	720	621 .131.2
IV. MISCELLANEOUS INFORMATION :		
Adapting Z-type fishplates for use under modern locomotive axle loads, Buenos Ayres and Pacific Railway	728	625 .143.4
V. MONTHLY BIBLIOGRAPHY OF RAILWAYS.	93	...

No. 9. — September 1931.

I. Application of Marbec's theory of kinetic diagrams to the determination of the velocities and accelerations of the different articulations of valve gear, by Pierre PLAGE	731	621 .134
--	-----	----------

No. 9. — September 1931 (CONTINUED).

	PAGES.	NUMBERS of the decimal classification.
II. Note on a method of fixing the track on a rigid, continuous and adjustable reinforced concrete platform, by V. FORESTIER	761	625 .14 & 721 .9
III. Railway electrification in Italy	768	621 .33 (.45)
IV. A new process for cleaning metal parts in railway workshops, by Mr. BÜRKLEN	783	669 (.43)
V. Railway accident reports. — Derailments at Weaver Junction, London Midland and Scottish Railway and Kent House, Southern Railway, Great Britain	788	656 .281 (.42)
VI. The Scottish Motor Traction Co. Ltd.	798	656 .1 (.42)
VII. MISCELLANEOUS INFORMATION :		
1. The Pintsch electric train-lighting system.	804	625 .235 (.43)
2. Screw-over side-tip wagons.	806	625 .245 (.42)
3. The new Gresham feed-water heater	808	621 .433.7 (.42)
VIII. NEW BOOKS AND PUBLICATIONS :		
1. Costruzione ed esercizio delle ferrovie. Volume secondo : Impianti (Construction and operation of railways. Second volume : Fixed plant), by Felice CORINI	810	621 .13 (.02, 621 .33 (.02, 625 .2 (.02 & 656 .23 (.02
2. Erläuterungen zu den Vorschriften für geschweisste Stahlbauten (Commentary on the regulations affecting welded metal structures), by Dr. Ing. O. KOMMERELL.	811	621 .392 & 69
3. Die Verstaatlichung der Schweizerischen Privatbahnen durch den Bund und ihre finanziellen Auswirkungen auf die Schweizerischen Bundesbahnen, von 1903-1913. (The nationalisation of the Swiss private railways and its effect on the financial situation of the Swiss Federal Railways, from 1903 to 1913), by Dr. E. A. DIETHELM	812	335 .15 (.494)
IX. MONTHLY BIBLIOGRAPHY OF RAILWAYS	411	...
 No. 10. — October 1931.		
I. Some considerations of an economic nature on the use of reinforced concrete sleepers, by D. Lévi de VÉALI	815	625 .142.4
II. The 4-6-2 high pressure (1 706 lb. per sq. inch) locomotive of the Deutsche Reichsbahn (German State Railways), by Fr. WITTE and R. P. WAGNER	823	621 .134.3 (.43)
III. The heat treatment of rails	844	625 .143.2 & 669 .1
IV. The modern application of the Sandberg sorbitic rail treatment, by Cecil J. ALLEN.	846	625 .143.2 & 669 .1
V. Small internal combustion motor locomotives operating on the Reichsbahn (German State Railways), by Fr. WITTE and O. STAMM	860	621 .43 (.43)
VI. Industrial electric heating for railway shops, by Wirt S. SCOTT	871	621 .39 (.73) & 669 (.73)
VII. CURRENT PRACTICE :		
New third class sleeping cars, London and North Eastern Railway	886	625 .232 (.42)
Radiography applied to railway materials, by Herbert R. ISENBURGER	889	62. (01

No. 10. — October 1931 (CONTINUED).

VIII. MISCELLANEOUS INFORMATION :

Pennsylvania Railroad experimental tender	896	621 .436 (.73)
Shovel packing.	897	625 .144.4 & 625.17

IX. NEW BOOKS AND PUBLICATIONS :

Les chemins de fer coloniaux de l'Afrique (The African Colonial Railways), by L. WIENER	899	385. (091) (.6)
Le contrat de transport. Première partie : Le contrat de transport en Belgique (Transports contracts. Part one : Transports contracts in Belgium), by E. STEVENS and R. HENNING	900	347 .762 (.493)
Costruzione ed esercizio delle ferrovie (Construction and operation of railways). — Third volume : Trazione termica e materiale mobile (Thermic Motor Traction and Rolling Stock), 2nd edition. — Fourth volume : Trazione elettrica e ferrovie speciali (Electric Traction and special Railways), 2nd edition. — Fifth volume : Movimento e traffico e questioni economiche (Operation, Traffic and Economic Questions), 2nd edition, by Felice CORINI	901	621 .13 (02, 621 .33 (02, 625 .2 (02 & 656 .23 (02.

X. OFFICIAL INFORMATION issued by the Permanent Commission of the International Railway Congress Association :

Meeting of the Permanent Commission held on the 25 July 1931 (Appendix : List of members of the Permanent Commission)	903	385. (06.111
---	-----	--------------

XI. MONTHLY BIBLIOGRAPHY OF RAILWAYS

133	...
-----	-----

No. 11. — November 1931.

I. The systematic adjustment of curve pegging by the correction of the versines, by J. CHAPPELLET.	911	625 .113
II. The riding qualities of railway coaches, by P. L. HENDERSON.	920	625 .215
III. Painting the Quebec bridge	933	698 (.71)
IV. A new rail brake.	942	625 .258 (.42)
V. The Erie Railroad installs retarders in Marion yard	946	625 .258 (.73)
VI. A railway breakdown crane of 105 tons capacity	952	621 .87 (.42)
VII. Statistics of rail breakages for the year 1930 (1st part)	956	313 : 625 .143.3

MISCELLANEOUS INFORMATION :

The Second International Steam-Table Conference. Skeleton steam tables	999	536.
MONTHLY BIBLIOGRAPHY OF RAILWAYS	149	...

No. 12. — December 1931.

I. Statics and dynamics of metal railway and road bridges, by A. VIERENDEEL	1003	624 .2 (01
---	------	------------

No. 12. — December 1931 (CONTINUED).

	PAGES.	NUMBERS of the decimal classification.
II. Main line railway electrification.	1027	621 .33 (.42)
II. Statistics of rail breakages for the year 1930 (2nd part)	1032	313 : 625 .143.3
V. MISCELLANEOUS INFORMATION :		
1. A high-powered rotary snow plough	1077	625 .174
2. New locomotive coaling plant at Nevers, Paris-Lyons-Mediterranean Railway.	1079	621 .138.2 (.44)
V. NEW BOOKS AND PUBLICATIONS :		
Le rôle de la Belgique dans le développement des chemins de fer (The part played by Belgium in the development of the railways), by U. LAMALLE	1083	385. (09)
American railway signaling principles and practices. Chapter XVI : Interlocking, by the SIGNAL SECTION, AMERICAN RAILWAY ASSOCIATION	1084	656 .257 (.73) & 656 .258 (.73)
Elektrische Vollbahnlokomotiven (Main line electric locomotives), by the A. E. G. in collaboration with the late Dr. H. GRÜNHOLZ	1085	621 .335
VI. MONTHLY BIBLIOGRAPHY OF RAILWAYS	161	...
II. ANALYTICAL TABLE OF ARTICLES according to the decimal classification	1 to 10	...
II. CONTENTS of the XIIIth year of the English edition	1 to VII	...
